RUBBER

PT Perkebunan Nusantara IX produces Ribbed Smoke Sheet (RSS) from rubber sheets that are properly dried and smoked, and through visual inspection by trained personnel.

We produce RSS with various qualities including RSS 1, RSS 2, RSS 3, RSS 4 and various other derivative products such as Thin Pale Crepe (TPC), Brown Crepe 1x, 2x, 3x, Skim, cutting and Thick latex.

Natural latex raw materials are produced from 12 plantations spread in Central Java with an area of ± 21,867 ha. with production of ± 26,000 tons per year.

Ekspor :

RSS

Ribbed Smoke Sheet (RSS) processed from rubber sap that passes through various stages of the process that is filtering, dilution, coagulate, grinding and fumigation. The sheets are assessed visually based on certain perimeter and then packaged in the form of bales with the size of a big balle (weight 113 Kg, dimensions 48x48x60) and small bale (weight 35 Kg, dimensions 70x30x15)

The quality of RSS PT Perkebunan Nusantara IX can be divided into 5 qualities : **RSS 1, RSS 2, RSS 3, RSS 4 & CUTTING**

Quality standards are set based on the green book

**BIG
BALE
113 KG**

48x48x60

**SMALL
BALE
35 KG**

70x30x15

TPC

Thin Pale Crepe (TPC) produced from quality latex processed through a long process to get a TPC that fits the needs of the community. Marketed in the form of bales weighing 80 Kg, dimensions 48x48x60. Product: TPC 1X

BROWN CREPE

Brown Crepe (BRCR) produced from natural rubber scrap produces brown BRCR products and is marketed as bale with a weight of 80 Kg, dimensions 48x48x60.

Products: BRCR 1X, 2x, 3x

CONCENTRATED LATEX

Concentrated latex is made through mixing or creamed latex processes and through centrifuging latex. Widely used for thin and high-quality rubber materials.

PT Perkebunan Nusantara IX has 15 RSS Rubber Factories, 1 TPC Factory, and 5 BRCR Factories. all factories are certified by ISO 9001: 2015 Quality Management System and 14001: 2015 Environmental Management System and Indonesian National Standard (SNI)

Came from fine and medium
passages (pekoe shoots, young leaves
and young bird leaves)

GRADE 1

BOP
Broken Orange
Pecco

The part is short, rather small, twisted black, consisting of short sternum bones mainly from young leaves containing little or no tip

BOPF
Broken Orange
Pecco Fanning

Shaped like a BOP, but smaller

PF
Pecco Fanning

Shaped like a BOP, but larger than fanning

BP
Broken Pecco

Short straight, consisting of stalks and young leaf bones that are not peeled off

BT
Broken Tea

Small, flat, not twisted well.

DUST

Small sized

PF II
Pecco Fanning II

Like PF, it contains more fiber.

BP II
Pecco Fanning II

It is shaped like BP, but it contains more stalks and old leaves that are peeled off and are more bleeding color

FAN II
Fanning II

Same with Fanning but more fiber

DUST II

Very small, contains a lot of fiber.

DUST III

Very small, more fiber than
DUST II

COFFEE

The coffee estate of PT Perkebunan Nusantara IX is spread over 4 plantations in Central Java with an area of ± 951.45 ha, cultivating 2 types of coffee that is Arabica and Robusta.
